of Chemical Engineers

REPORT of ETCC2022

European Technical Coatings Congress ETCC2022 took place at Auditorium Maximum of the Jagiellonian University, one of the world-wide oldest universities, established in the year 1364 in Krakow (www.etcc2022.org).

ETCC2022 presentations concerned the latest achievements of science and technology in the fields of paints, coatings, construction materials and adhesives.

The Congress began on 11 July 2022 with a special session: "SummerSchool" dedicated to young scientists (8 lectures were delivered, 60 people from many countries participated).

ETCC2022 was finalised on 14 July 2022 by a Closing Ceremony with awards for the best presentations.

The congress programme included:

- 108 papers in 5 parallel sessions and 3 plenary presentations
- 60 thematic posters displayed on presentation panels
- 354 congress participants from 26 countries around the world
- Session Moderators – 35 scientists
- Participation of 15 exhibitors from 7 countries
- ETCC2022 participants received:
 - Congress book with a detailed programme and list of authors
 - Abstracts of papers on pen drive as pdf files
- Congress dinner at the "Stara Zajezdnia" restaurant with over 140 participants (with a string quartet concert).

Main topics of the congress presentations:

- Advances in science of paints, coatings, adhesives and construction materials
- Polymers and other raw materials usage
- Corrosion protection products
- Products and process legislation
- Chemical composition and products specifications
- Environment, safety and health issues
- Progress in processing and production
- Equipment and production lines
- Application methods and application equipment
- Measuring and testing, quality systems
- Thermal and weathering degradation of paints and coatings

Awards 1000 Euro each, granted for the categories:

- ✓ Best presentation of the congress
- ✓ Best paper presented by a young scientist
- ✓ Best paper with ecological content (endowed by ATIPIC)

ETCC2022 was one of the most prestigious and most important technical and scientific events, creating a platform and a meeting point of industry and of science, represented by institutes and universities. It provided the possibility of international co-operation and collecting unique knowledge about the newest materials, products, processing, equipment, research, and testing.

ETCC2022 Congress Organisers:

- ❖ **FATIPEC** – Federation of Associations of Technicians for Industry of Paint in European Countries (www.fatipec.com), founded in Geneva in the year 1950. Members of FATIPEC come from 13 country associations, the seat is located in Paris. The main areas of activities: development and dissemination of the scientific and technological wide scope of knowledge related to production, formulation, application, and development of paints and coatings.
- ❖ **SITPChem** – Polish Association of Chemical Engineers (www.sitpchem.org.pl) founded in 1927 in Warsaw. The main activity areas are related to the exchange of scientific, technical knowledge and experience, educational programmes, seminars, as well as projects related to chemical legislations.
